Dr.R.F. Schaufele,
ESSO Research & Engineering Co
Analytical Research Division,
P.O.Box 121,
Linden, N.J.07036 (U.S.A.)

our ref.642/lmv

Dear doctor Schaufele:

According to your request of Aug.8, 1966, I send you, under separate cover, a sample of highly syndiotactic polypropylene (index of syndiotacticity ≈ 2.2). The polymer has a low molecular weight, which has not been determined. If you prefer, you may not return the specimen.

With best regards,

Giulio Natta

Dear doctor Schaufele:

I mostly apologize for answering your letter of Aug.8 with such a delay.

We read your manuscript with much interest and ask you to kindly keep us informed on your results. By now, an apparatus of such a capacity is not available to us.

We are just preparing the sample of syndiotactic polypropylene you required and hope to sent it to you within the first fortnight of November.

Kindest regards.

Giulio Natta

Dear Professor Natta:

Recently I have been studying the normal vibrations of isotactic polypropylene by means of the Raman effect. Enclosed are some preliminary results. It would be interesting to examine the low frequency vibrations of syndiotactic polypropylene by this approach. Would it be possible for your laboratory to furnish ~1 gm. of this polymer, in powder form, for a definitive spectroscopic study? The specimen could later be returned after study.

With best regards,

Yours Sincerely,

Robert Schaufele

Dear Professor Natta:

I have received your letter of November 21, 1967 concerning Mr. M. Notarbatolo.

Mr. Notarbatolo visited us a while ago and our patent people were favorably impressed by him. As a consequence of his visit and of your recommendation, we have decided to give him some patent work on a trial basis. Also within the next few weeks, I understand, Mr. Notarbartolo will receive some new patent applications to be filed in Italy.

We are grateful to you for this recommendation.

I am sending you my kindest regards.

Yours very truly,

J. P. Kennedy

Dear doctor Kennedy,

I apologize for my delay in answering your kind letter of May 19, concerning your visit to my Institute.

The date of July 4 (at around 10 a.m.) you chose for your visit is convenient to us. If you do not object, you might deliver your seminar on "Carbonium Ion Polymerization, 1967" on July 4 at 11 a.m.

Please, confirm by cable whether that time is convenient to you, to enable me to send invitations.

You have been registered at the Hotel Manin, Via Manin, for the nights from July 3 to 5.

Looking forward to meeting you, I send you kindest personal regards.

Giulio Natta

Dear Professor Natta:

Thank you for your letter of March 21st. This is just a short note to confirm my visit to you and your institute. Thus I will arrive in the afternoon of July 3rd. I would like to ask you the favor to reserve a room for me in a hotel July 3, 4 and 5. In the morning of ~~July 4th~~ I will then come to your institute at around 9:30 A.M if this is convenient for you.

~~Handwritten scribble~~

I will leave the United States in a few days; if you would want to contact me you can reach me either in Brussels at the IVPAC meeting or from June 24 to 27 at the following address:

Dear doctor Kennedy:

Thank you for your letter of Feb. 17.

My co-workers and I will be very glad to meet you in Milan, and would greatly appreciate your giving a seminar on "Carbonium Ion Polymerizations, 1967".

Unfortunately, there is a small difficulty about the date of your visit. June 2, 3, and 4 are holidays and all researchers will be absent. Therefore you should postpone your visit either to the week of June 5 to 9 or of June 19 to 23.

Looking forward to hearing from you on this matter, I send you kindest personal regards,

Giulio Natta

Dear Professor Natta:

I am planning to be in Europe for the International Symposium on Macromolecular Chemistry in Brussels in June 1967 and would like to visit you and some of your coworkers. Particularly I would like to meet Drs., L. Porri, A. Valvassori and G. Dall'Asta of your institute who in cooperation with you are contributors to the book on "Synthetic Elastomers" which I am coediting and is now in the process of being published. I will be pleased to see Dr. Porri again whom I met some years ago in New York.

If you would like to, I could give a lecture at your institute on one of my subjects. A list of proposed presentations is attached for your selection. Also I would like to discuss non-confidential matters of mutual interest with your co-workers.

June 3 and 4 would be convenient dates for my visit in Milano.

Wishing you all the best and with personal best regards.

Chiarissimo Professore,

siamo molto lieti di accluderLe il testo completo di alcuni lavori, pubblicati dalla nostra consociata Esso Research and Engineering Co. e contenuti nella pubblicazione "Search" in riassunto, da Lei richiesti il 17 novembre 1965.

Desideriamo scusarci per il ritardo con cui glieli inviamo, dovuto alle difficoltà incontrate per trovare i testi presso i relativi autori.

Come vedrà, il testo del lavoro pubblicato a pag.6 di "Search" non è accluso. Si tratta di "The Characterization of the component distribution in the fractionation of Multi-component Mixtures" di Roger M. Butler e Israel Pasternak, che è stato chiesto agli autori e Le invieremo non appena in nostro possesso.

RingraziandoLa molto per l'interesse verso le nostre pubblicazioni, La preghiamo di gradire i nostri migliori saluti.

August 10, 1964

Prof. Giulio Natta
Chemistry Department
University of Milan
Milan, Italy

Dear Prof. Natta:

In the middle of September, I plan to be on a trip through Italy and would like very much to visit your institute in Milan. I have not had the pleasure of meeting either you or your collaborators at meetings. However, I've been working in the field of rheology for a considerable time and know your work in the field of polyolefins quite well. I think there could be subjects of mutual interest that we could discuss at this meeting.

I am not making a special detour to come to Milan, as I am visiting Dr. Giorgio Segrè at Cartiera Vita Mayer in Milan, who visited me at Esso after the International Congress on Rheology last fall. I have also met Prof. Liquori now of Naples at Montreal in 1962 at the International Union of Chemistry meeting, who I believe formerly worked with you.

I hope this visit will be possible and hope to hear about your decision soon.

Yours very truly,

W. Philippoff

OGGETTO: Opposizione dom. di brevetto Inglese 796.845
Esso Research & Eng. Co. (107/177).

Egregio Professore,

Le alleghiamo copia della dom. di brevetto in oggetto contro la quale è in corso da parte nostra un procedimento di opposizione.

Entro il 21 Febbraio dovrà essere presentata presso il Patent Office la nostra Evidence per la preparazione della quale occorrerebbe che Lei provvedesse a fornirci dati sperimentali atti a dimostrare:

- 1) L'impiego di clorobenzolo come diluente inerte non è sufficiente per distinguere l'invenzione della domanda in oggetto dalla invenzione del brevetto inglese 810.023 a nome Montecatini-Ziegler (Pool I).
- 2) L'impiego di clorobenzolo non porta a risultati migliori di quelli ottenibili con l'impiego dei diluenti inerti descritti nel nostro brevetto 810.023.
- 3) Riferimenti atti a dimostrare che il clorobenzolo è un solvente noto per la polimerizzazione.

La preghiamo di voler prendere in esame questo caso con cortese sollecitudine, poichè il termine per la presentazione dell'Evidence al Patent Office è molto prossimo e dubitiamo di poter ottenere ulteriori estensioni.

La quantità e la qualità dei dati che ci verranno forniti avrà molta importanza per la preparazione dell'Evidence.

In attesa della Sua cortese risposta La preghiamo di gradire distinti saluti.

SERVIZIO BREVETTI.

Dear Professor Natta:

As you will recall from my previous visits, I am serving as the European Scientific Liaison Representative of Esso Research and Engineering Co.

According to my present plans I will be in Milan on Tuesday and Wednesday, September 15 and 16, and I wondered whether I could drop by to see you for a half-hour or so, sometime on Wednesday. I will be accompanied by Dr. H. M. Ashton who has joined me in our Technical Liaison effort, and I would like to introduce him to you, if this is convenient.

If you have the opportunity to drop
me a note at my London address
(now 50 Stratton Street, London W1),
that would be fine, but if not, there is
no concern because I will telephone
you sometime on Tuesday to see whether
this ^{visit} is feasible. In other words, I
will definitely telephone you or your secretary
on Tuesday because I will be leaving
London early on Monday, and may
possibly not see the mail.

Naturally, we would be glad to
help you in any items in case you need
new petroleum hydrocarbon samples
etc. Also, you may be interested in
some of our work on Butyl rubber
etc.

I trust that you and your family have
had a pleasant summer, and I look
forward to seeing you on this trip to
Italy, or on some other early occasion
if this is not convenient.

Very truly yours,

Walter D. Geyer

I will be back in London on Friday, Sept 11th.
